Description

Our Commercial Stainless Steel Lumpia Wrapper Machine is engineered to produce high-quality spring roll and crepe sheets with consistent thickness from 0.2 to 2 mm. Built with SS304 food-grade material, it ensures durability, hygiene, and dependable performance for hotels, restaurants, fast-food chains, and food factories across the Philippines. This machine delivers high output with easy operation, ideal for businesses looking to upgrade production of lumpia wrappers, crepes, or other laminated pastry products. We custom made any diameter or square size.
